LETTER OF INTENTION – Work Permit

February 26th 2025

Immigration Refugees and Citizenships in Canada

To whom it may concern,

My name is **Olavo Pereira de Mello Neto, UCI 11-2553-9388**, currently live at 809-104 Garment St., Downtown, Kitchener, Ontario Canada,N2G 0C8 and I am writing about my Work Permit linked to my **Startup Visa** application. My current Work Permit will expire on May 30, 2025, and I would like to formally request an **Open Work Permit Extension** for myself and my wife, **Sandra Peres Caram Pereira de Mello**, **UCI 11-2554-4708**. Furthermore, we are eagerly awaiting a decision on our Permanent Residence application submitted in August 2022.

Professional and Business Progress

As the Chief Technology Officer (CTO) of Bringfy, my role has been crucial in advancing the company's presence and integration into the Canadian market. Over the past year, we have made significant strides in expanding our operations, refining our technology, and establishing key partnerships. Our goal remains to revolutionize last-mile delivery through innovative technology, ensuring efficiency, reliability, and sustainability.

Key Achievements in 2023-2024

- **Business Expansion:**
  - Successfully developed our B2B platform and integrated it with our B2C platform;
  - Established key partnerships.
  - Achieved our first beta customer;
- **Market Readiness and Technology Advancements:**
  - Developed and launched MVP versions of our Client and Driver apps.
  - Completed integration of B2B and B2C platforms, with ongoing improvements based on Canadian market feedback.
- **Funding and Growth Prospects:**
  - Engaged in discussions with potential investors, including meetings with Rodonaves and Santa Emília Group.

About me and my professional career

When I was young and starting to work, I had an opportunity in a small Data Center in my hometown when I discovered my aptitude for technology and the internet. However, living in a small town was not enough, so I had to move to a bigger city, Ribeirão Preto, to look for new opportunities and ways to improve my knowledge. That's why I started my degree in Computer Science at Centro Universitário Barão de Mauá and was hired by a specialized company, a joint venture (Brazil-Italy) that brought me the right opportunities to participate in projects of large companies such as Coca-Cola, Banco Itaú, 3M, among others. Unfortunately, I could not finish my degree due to my great involvement in this company, where I stayed for 8 years. I then assumed the position of Project Manager.

Entrepreneurship

In 2008, I decided to open my first business, Agência Dix - agenciadix.com.br - targeted online marketing, development, and consulting. Today, fourteen years later, we serve hundreds of customers who use our E-Commerce Platform and Marketing Services in several countries. The administration of this business is completely online, which allows me to be anywhere without harming the progress of the business.

I am a born entrepreneur, as shown in my resume attached, and over the years, I founded some companies in different areas, but technology was in their DNA. For example, the company Probase - probase.com.br - which I started in 2018, specializes in Auto-Tracking and now has more than 1500 clients, where I have Vinicius Medeiros Chaves as a business partner.

At the beginning of 2020, I was invited to take part in a new company, the Start-up called e-Carreto, which specializes in *last-mile delivery*. Founded on Tech Center Supera Park, an environment of innovation and entrepreneurship from The University of São Paulo (USP), we have a group of investors backing this company, and we aim to become the first fully online shipping company in Brazil. This company, especially, brings me great challenges because of my position - the CTO (chief technology officer).

Financial Justification and Investment Sources

A crucial part of our business development and expansion in Canada involves financial planning and securing the necessary investment to sustain and grow Bringfy. To that end, we have all the support and commitment from our investors in Brazi,l and we also allocated resources for this purpose. In my wife's name, we hold multiple accounts that collectively contribute to our financial stability and planned investment. These include:

- PagSeguro BRL$ 33.695,94 (CAD$ 8,364.58)
- PicPay BRL$ 168.813,34 (CAD$ 41.675,98)
- Sicredi BRL$ 9.175,64 (CAD$ 2.265,27)

Totalizing the amount of **CAD$ 52.305,83**

The reason these funds are under my wife's name is due to financial structuring and ease of access to different financial institutions in Brazil. Given her long-standing financial history and established banking relationships, maintaining these funds in her accounts allows for smoother transactions and more efficient fund management, ensuring that we can allocate resources promptly as needed for the company's growth in Canada.

Why Canadá?

Our decision to establish Bringfy in Canada is a long-term commitment. The supportive business ecosystem, access to technology-driven logistics markets, and opportunities for growth make Canada the ideal place for our company's expansion. The incubation process at Ontario Tech University has further strengthened our ability to adapt to the local market and refine our strategies accordingly.

On a personal level, Canada has been a transformative experience for my family. My wife has successfully integrated into the workforce, and my daughter has found immense joy and academic progress in her schooling. This reinforces our intention to contribute meaningfully to Canadian society both professionally and personally.

The company

More than a Start-up, Bringfy is a company that was born big, supported by our company in Brazil, and actuating in a segment that is loud for innovation. Focused on last-mile delivery, we are the future of the *LogiTechs* and a new way to send products and manage the company's delivery.

The last year has been productive and enforced the choice of Canada. Our Progress Report 2024 shows how we were able to grow as a company and me as a professional and entrepreneur. I had the opportunity to participate in events such as Collision Conference, have meetings and talks with great names, CEOs, CTOs, and much more, and connect to companies and planning future partnerships, building a solid and confident pathway to the company.

The company in Brazil, based now on Dabi Business Park, has also grown and we have now **93.851 orders generated, 31.459 users, and 7.225 driver partners.** We are having new meetings with interested investors. The proposal, shown in our Video Pitch, to turn a global company launching Bringfy in Canada has been a great motivating factor for new investors and large groups that we have spoken to RTE Rodonaves, Santa Emilia Group, and others.

Our website, SEO (search engine optimization), Google Ads, and social media marketing have been done and LinkedIn has been used to connect companies and professionals who come to us through articles and direct contacts as part of our Business Plan B2B approach.

As demonstrated in the file Business-GoogleAds we have been doing experiment ads to prepare the campaign to launch matching the right segment and target.

As a new Startup, a great part of our days has been researching, meeting, developing, and testing our solutions and apps. To demonstrate part of this process, I'm attaching to this letter **Screenshots (at the bottom of the document)** of the platform running in the *Beta* version online (panel.bringfy.ca).

We opened positions for Sales and Drivers and received a number of promising applications, with whom we have maintained contact since. Our close collaboration with the incubator has been invaluable; we have participated in events and sought professional guidance and support as needed. Additionally, we engaged in the Brilliant Work-Integrated Learning (WIL) program and hired students to assist with accounting, marketing, and software development. The LOS - Letter of Support from Ontario Tech University underscores our commitment to adhering to best practices and making a positive impact in both the Canadian and global markets.

Extending my Work Permit is crucial to ensuring the successful implementation of our business plan in Canada. Our company is poised for significant growth, bringing economic benefits, job creation, and technological advancements to the logistics sector.

I appreciate your time and consideration of this request. Please feel free to contact me for any additional information.

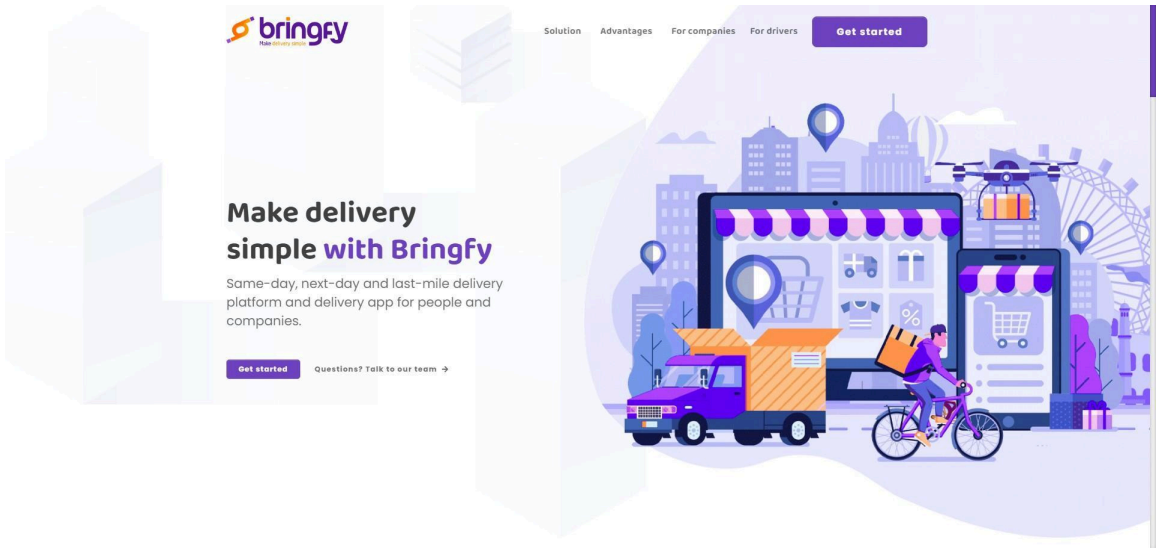

Sincerely,

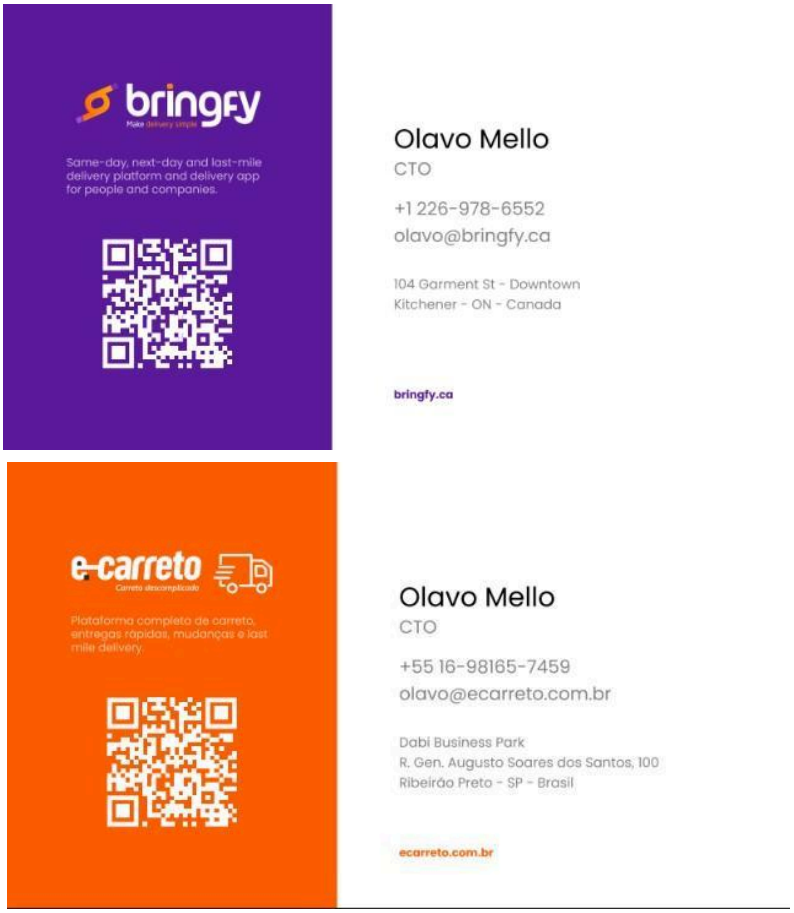

Olavo Mello
