Application update

We have been retained by the above-mentioned client to represent him in connection with his application for permanent residence under the Start-Up Visa Program.

We would like to take this opportunity to provide an update to our client's application with relevant information concerning his business, business partners, and other pertinent developments.

Bringfy Inc. is a technology-driven logistics company specializing in last-mile, same-day, and next-day deliveries. The company connects individuals and businesses with professional drivers through an integrated digital platform, offering efficient, reliable, and accessible delivery solutions.

Bringfy Inc. continues to play an active role within Ontario's startup ecosystem, exemplifying the success and integrity of the Brillian Catalyst program while contributing meaningfully to Canada's broader innovation agenda.

The Canadian last-mile delivery sector is experiencing rapid growth, largely fueled by the expansion of e-commerce and service-based logistics. Despite this growth, the market remains predominantly controlled by large international corporations such as Amazon and Walmart, which limits flexibility and competitiveness for Canadian retailers and small businesses. Bringfy Inc. provides an innovative, homegrown alternative that empowers local merchants and consumers, enhances competition, and strengthens Canada's domestic logistics infrastructure.

We firmly believe that Bringfy Inc. aligns with the core objectives of the Start-Up Visa Program — namely, fostering the establishment of innovative Canadian businesses that address local market needs, generate employment opportunities, and support professionals who contribute to economic growth and community development.

Furthermore, Bringfy Inc. is developing community-oriented initiatives designed to create meaningful social impact. One such project aims to connect individuals, charities, and organizations wishing to donate essential goods with those most in need, thereby strengthening community ties.

Bringfy Inc. is committed not only to business growth and innovation but also to making a tangible difference within the community — bringing together people, providing support, and delivering both goods and hope to those in need.

We would like to reiterate that following Mr. Polaco's departure from the company, his responsibilities—primarily involving driver coordination and initial logistics outreach—were promptly reassigned to Mr. Chaves. This transition ensured the continuity of operations and the uninterrupted execution of ongoing projects.

Mr. Chaves, a co-founder of the company, possesses extensive experience in fleet management, logistics, and financial administration, acquired through his prior work with his own company, Probase. For further details regarding Mr. Chaves' qualifications and his

continued involvement with the company, please refer to the attached document titled **"Letter of Explanation to IRCC."**

Attached to this update letter are the following documents, which we kindly ask the officer to consider when processing the application:

1. Letter of business validation from Innova in Canada Corporation.
2. Letter of Explanation to IRCC from the applicants.
3. Letter of support from a business consultant and IMPA counsellor.
4. Support confirmation letter from Ontario Tech University - Brillian Catalyst.

We trust that this update provides the reviewing officer with a clearer understanding of the applicant's business proposition, research, and objectives, all of which are aligned with the core vision and intent of the Start-Up Visa Program.

Should any additional information or documentation be required, please do not hesitate to contact us.

Sincerely,

Terry-Lee Ferreira
