Progress Report 2025

The year 2025 marked a decisive transition from platform validation to structured operational readiness in Canada. Following the completion of B2B and B2C integration and MVP validation achieved in previous years, the company focused on regulatory alignment, operational formalization, financial governance, and scalable technology infrastructure.

The company continues to align its logistics model and digital ecosystem with Canadian regulatory standards while maintaining strategic ties with the Brazilian operation, e-Carreto, which continues to provide operational data and experience.

2025 has been defined by consolidation, preparation for controlled scaling, and strengthening institutional credibility within the Canadian innovation ecosystem.

Executive Summary:

Mission:

Being the primary channel connecting sellers and transporters, fostering a user-friendly journey for quick transport requests.

Vision:

Harnessing technology to revolutionize how people send and receive goods.

Values:

Reliability, Self-awareness, and Partnership.

Key Metrics:

e-Carreto, Brazil

- Continued operational growth and platform refinement
- Strengthened logistics processes based on real delivery data
- Expanded partnerships with local businesses
- Accumulated operational experience from tens of thousands of completed deliveries
- Data-driven improvements applied to Canadian product development

Bringfy, Canada

- Full B2B and B2C platform integration maintained
- Backend architecture optimized for scalability and multi-city deployment
- Structured onboarding model for drivers implemented
- 3 main beta customers actively validating operational flows
- 99.9% platform uptime achieved
- 144 registered drivers onboarded within the platform ecosystem
- Technology infrastructure prepared for controlled expansion in Ontario

Technology Evolution and Infrastructure Readiness

Scalability and robustness initiatives included:

- Backend modularization to support multi-region deployment
- Cloud-native infrastructure optimized for performance and uptime
- Route logic refinement based on structured pilot feedback
- Strengthened data security and compliance alignment

The platform is now positioned to support structured volume growth without architectural constraints.

Market Validation and Expansion Strategy

Market efforts concentrated on Ontario-based small and mid-size enterprises, consistent with the defined Target Market Strategy.

- Marketing and Sales Specialist hired, and a new partnership strategy is being tested

- Direct outreach to logistics-dependent businesses
- Beta partnerships for operational validation

- Refinement of value proposition based on Canadian market feedback
- Positioning focused on competitiveness for SMEs rather than enterprise-only logistics

Operational Structuring

Significant efforts were made to formalize internal processes:

- Defined logistics and customer care workflows
- Established structured marketing and sales pipeline aligned with defined qualification stages
- Structured driver onboarding and quality control procedures

---

Financial and Governance Progress

During 2025, the company emphasized financial discipline and regulatory alignment in Canada:

- Corporate compliance maintained in Ontario
- Accounting and Payroll system implemented
- Revenue model assumptions validated through pilot engagement
- Funding strategy aligned with measurable traction milestones

---

Partnerships and Ecosystem Engagement

- Continued engagement with innovation ecosystem stakeholders
- Strengthened relationships with incubators and institutional partners
- Participation in strategic networking initiatives
- Recognition of e-Carreto as a Top Logistics Network Platform

Challenges Faced

- Driver engagement consistency during early platform adoption
- Investor caution in a capital-sensitive environment
- Operational cost management during the pre-revenue stage
- Market education in a competitive last-mile ecosystem
- Balancing growth ambition with disciplined financial management

Strategic Roadmap for 2026

The next phase of growth will focus on structured commercialization and controlled scaling:

- Expand driver network to support multi-city operations
- Transition from beta validation to structured commercial rollout
- Initiate structured funding round aligned with operational traction
- Explore accelerator participation for institutional strengthening

Conclusion

2025 solidified the company's foundation for scalable expansion in Canada. Through disciplined operational structuring, technology optimization, financial governance, and strategic market positioning, Bringfy has prepared the necessary infrastructure for controlled and sustainable growth.

The company remains committed to strengthening partnerships with drivers, expanding institutional credibility, and transforming the logistics experience for businesses and consumers.
